FAQ & ERRATA

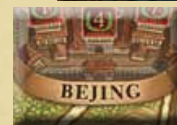

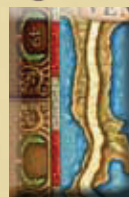

ERRATA – Small mistakes that were unfortunately overlooked.

Unfortunately, a few slight errors found their way into the rule book and the game board. Rest assured, however, that none of these errors affect the gameplay, and we are only reporting them here for the sake of clarity.

WHAT, THEN, ARE THESE ERRORS?

1. The Components list on page 2 of the rule book contains 2 small quantity errors. Instead of the listed 21 small Camels and 3 large Pepper Sacks, the game actually includes **20 small Camels and 4 large Pepper Sacks**. The number of Goods and Camels available in the game are unlimited, so this quantity change does not affect the game. (Unfortunately, there was a communication error, and an older listing of the wooden parts quantities was used inadvertently.
2. The “**48**” space on the scoring track is missing its number. It must have been eaten by sea monsters that enjoy numbers. We are confident that you can count the space without its number. We also feel that the number “42” would have been more delicious, but that is not for us to decide...
3. The city of **Beijing** is misspelled on the game board as “Bejing”. We sincerely apologize for this error, and hope that this doesn’t cause any displeasure with our Chinese friends. This error was certainly not intended.

RULES CLARIFICATIONS – To address some ambiguities.

DIFFERENCES BETWEEN, AND CLARIFICATIONS FOR, “THE MARKETPLACE” AND “THE FAVOR OF KHAN”

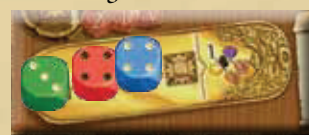

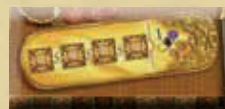

The “**Marketplace**” action area consists of **4 separate action spaces**, for the taking of Gold, Silk, Pepper, or Camels. If a player decides to perform the “Marketplace” action, he must choose which one of the 4 actions spaces he wishes to use, depending on the item associated with it; for example, Camels.

If he decides to perform the “Marketplace” action on a later turn in the same round, he may not select the “Camels” space again, since dice of each player color (blue, yellow, green, red) may only be used **once per action space in a single round**. Continuing with our example, the player would have to select a different action space, such as “Pepper”. **Exception:** By using black or white dice only, a player **may** perform the same action again in a round.

The “**Favor of Khan**” action area consists of **1 action space** made up of 4 dice fields. Therefore, each player may only place a die of his color (blue, yellow, green, red) **once per round** in the entire “Favor of Khan” action area. The player does **not** have to pay Coins if one or more of the dice fields are occupied; the only placement condition is that the value of the placed die is equal to or higher than the one to its left. **Exception:** By using a black or white die, a player **may** perform the “Favor of Khan” action again in a round.

Example: **Green** has placed his die (showing a “3”) on the leftmost field in the “Favor of Khan” action area, and both **Red** and **Blue** placed one of their dice (both showing a “4”) on the next 2 fields. Therefore, the “Favor of Khan” action may not be performed again by **Green**, **Red** or **Blue** with their player color this round (they may, however, use a black or white die to do so).

CAN THE ADDITIONAL ACTION “TAKE 3 COINS” BE PERFORMED WITH A PLAYER’S LAST DIE?

Yes. A player may take any number of additional actions before or after taking his main action on a turn. If he uses his last available die to take the additional action “Take 3 Coins”, he then has no more dice left to use in this round, and can therefore take no more actions that require the use of dice.
