

Axis & Allies

1942 2nd Edition Reference

SETUP

Players choose country (Germany/Japan vs Soviet Union/USA/UK)
Take plastic pieces and place starting units as indicated on cards.
Place control markers on IPC production chart at starting values.

Game Round - players each take full Turn Sequence in order:

Soviet Union, Germany, UK, Japan, USA

Victory - Control 9 if Axis or 10 if Allies (of 13-Honolulu also one)
victory cities at the end of U.S. Optional: control all 13.

GENERAL COMBAT SEQUENCE

AA Artillery - If present, roll 1 die / plane (max 3 die per AAA);
destroy plane per 1 rolled

- Place Units Along Battle Strip** - in corresponding columns.
• Attacker's allies do not participate, but defender's allies do.
- Submarine Surprise Strike or Submerge** - Attacker and Defender may do if opponent has no destroyers.
• Strike: attack now instead of step 3/4; remove hit units this step.
• Submerge: remove sub from battle board & place back in area.
- Attacking Units Fire** - roll die per unit, hit on <= (A)ttack value
• Defender moves casualties behind casualty strip, but must assign so max hits done. Casualties still fire in next step.
• Transports: cannot be chosen unless no other eligible units.
• Air Units: cannot hit subs, unless friendly destroyer present.
• Submarines: cannot hit air units.
- Defending Units Fire** - roll die per unit, hit on <= (D)efense value
• Attacker removes casualties following same rules as defender.
- Defender Removes Casualties** - Also note any changes in sub/destroyer or infantry/artillery relationships and adjust accordingly.
- Press Attack or Retreat** - Repeat #2-5 until destroyed or retreat.
• Attacker Retreat: move all land/sea units to 1 area attacked from.
- Conclude Battle** - Return units to game board. If attacking land units remain, gain control of area.
• Place control marker if area originally enemy, or remove if ally. Adjust production track.
• Industrial Complex: can mobilize units at captured IC next turn.
• Capturing Capital: Also take all IPCs from nation. Player with captured capital may not collect income or buy units.

TURN SEQUENCE

- Purchase Units** - Pay IPCs for units, place in mobilization zone.
• May repair Industrial Complexes for 1 IPC per damage.
- Combat Move** - must end move in combat/hostile area (or w/ enemy subs/transports).
• May move up to speed and cannot enter neutral areas.
• Sea Units: may move from combat to friendly or hostile area.
• Air Units: must save enough movement to land after combat.
• Amphibious Assaults: move transport with land units next to area and declare intention to attack. May move into non-hostile areas; must fight sea battle first in order to offload units.
• Aircraft Carriers: planes move before carrier. Ally nation planes on carrier can't attack. Landing/Taking off is not an extra space.
• Submarines: may move through enemy areas w/o destroyers.
• Tanks: can blitz through unoccupied hostile area, take it over, and continue moving to another hostile area or friendly area.
• Transports: may load land units, if planning amphibious assault. May not unload in area with enemy non-submerged submarine.
- Conduct Combat** - do bombing raids & amphibious assaults first.
• Strategic Bombing Raid: bombers Industrial Complex area may do instead of normal attack. IC AAA: Roll 1 die / bomber, destroy bomber per 1 rolled. Then roll 1 die/bomber, sum of dice=damage to IC (mark with chips). Max total is 2x area IPC.
• Amphibious Assaults: Do any sea combat first. Then Battleships/ Cruisers (max 1 per land unit assaulting from transports) that did not fight a sea battle may attack land units once; hit troops still fire back. Last, do land battle; transported units may not retreat.
• General Combat: attacker decides order. See Combat Sequence
- Noncombat Move** - move units that didn't move/fight this turn.
• May move up to speed and cannot enter neutral areas.
• Land Units: move to any friendly area.
• Air Units: land in non-hostile area (from start of turn) or on carrier if fighter. Aircraft carriers may move before fighters.
• Submarines: may move into hostile areas, but must stop if enemy destroyers present.
• Transports: may load/unload units. Must stop on unload.
- Mobilize New Units** - place units purchased earlier in turn at Industrial Complex locations controlled from start of turn.
• May only place # units <= area's IPC value (minus IC damage).
• Any units unable to be placed may be returned for refund.
• Sea Units: go in sea next to IC, even in hostile area.
• New ICs: place in area controlled at start of turn.
- Collect Income** - gain IPCs equal to your production level, unless not in control of capital.

UNIT PROFILES

Type	\$	A	D	M	Notes
Infantry	3	1	2	1	For each artillery, one Infantry A=2
Artillery	4	2	2	1	For each artillery, one Infantry A=2
Tank	6	3	3	2	Blitz: move through and capture empty enemy area during combat move.
Antiaircraft Artillery	5	-	-	1	Noncombat move only. May be taken as casualty. Roll 1 die per plane before combat. Hit on 1.
Industrial Complex	15	-	*	-	Built in AAA against strategic bombing. No produce same turn captured. Cannot build IC in area just taken.
Fighter	10	3	4	4	May land on carriers, takes off before combat, and must try to land if carrier gone. Must have landing plan, no suicide.
Bomber	12	4	1	6	May attack IC. After IC AAA fire, roll 1 die/ bomber. Sum of dice=damage to IC.
Battleship	20	4	4	2	Two hits to kill, turn sideways on 1st. If not destroyed, turn back up. May attack land once w/amphibious assault.
Aircraft Carrier	14	1	2	2	Carry 2 fighters. Ally fighters on may defend, but not attack.
Cruiser	12	3	3	2	May attack land once w/amphibious assault.
Destroyer	8	2	2	2	Cancels all enemy submarine capabilities
Submarine	6	2	1	2	Combat: Surprise Strike / Submerge. Move through hostile sea w/no destroyers. Does not block enemy movement. Cannot hit air units. Air units w/o destroyer cannot hit.
Transport	7	0	0	2	Does not block enemy movement. Must be chosen last as casualty. Carry 1 infantry + 1 other land unit. May load while moving, must stop on unload
\$ = Cost A = Attack D = Defense M = Move					

GENERAL

IPC Production Chart - nation markers determines IPC income and is sum of IPC values on controlled areas.

Plastic Chips - stack under pieces to represent more units.
gray=1 green=3 red=5

Canals - land/air units can cross, for ships to go through, both land areas must be friendly at start of your turn.
