

Guide to Grand Austria Hotel

SET-UP

- * Place the components (dustbin, dishes, VP markers, rooms by color) next to the game and action boards.
- * Shuffle the Guest cards and place them face-down on their designated space. Draw 5 and place each one face-up in a Guest space.
- * Shuffle the Staff cards and place them face-down near the game board.
- * Draw a Politics card from A, B, and C and place them on their designated spaces on the game board.
- * Draw an Emperor tile from A, B, and C and place them on their designated spaces on the game board.
- * Place 10 / 12 / 14 dice for 2 / 3 / 4 players on the Action space. Return unused dice to the box.
- * Take the Turn Order tiles for the correct number of players.
- * Each player takes an Overview card, Hotel board, and the 6 wooden disks in their color.
- * Place one wooden disk on the 0 space of the Emperor track, the 0 space of the VP track, and one on the 10 space of your Money track. Set the other three disks aside – you may use them later to engage in politics.
- * Each player takes one of each colored cube – **coffee**, **wine**, **cake**, and **strudel** and places them in their kitchen.
- * Draw 6 Staff cards and keep them hidden. Optionally, use the lettered sets (Intro) or Draft (Experience) as written in the rulebook.
- * Place the round marker on space 1 of the Round track.
- * Decide which side of the Hotel board to use.
- * Randomly determine a start player. The start player receives Turn Order tile 1. The next clockwise receives Turn Order tile 2, etc.
- * Beginning with the last player and proceeding counterclockwise, each player chooses a Guest from the face-up ones and places it in their Café at no cost. After each choice, slide the remaining Guests to the right and place a new one on the empty left space.
- * Players then prepare up to 3 rooms by taking Room tiles and placing them on the same-colored spaces of their Hotel board. You **MUST** start with the bottom left of your Hotel board. Subsequent Room tiles **MUST** be placed orthogonally adjacent to already placed ones. You pay the cost associated by moving the disk on your Money track down.

GAMEPLAY

The game is played over 7 rounds. At the end of rounds 3, 5, and 7, there is an Emperor Scoring. After round 7, there is also a Final Scoring.

COURSE OF PLAY

At the start of each round, the start player (who has Turn Order tile 1) takes and rolls the dice, sorting them by

number and placing them on the corresponding Action spaces. Then, the start player takes a turn or passes.

Actions

On your turn, you take the following actions:

- 1.) Take a Guest from the game board (optional)
- 2.) Take a die and carry out the corresponding action (mandatory)
- 3.) Take any appropriate additional actions

Take a Guest

On your turn, you may take one of the 5 face-up Guests on the game board and place it in your Café.

Pay the cost associated with the guest as printed on the game board, moving your disk on the Money track down. Then place the Guest on a **FREE** space in your Café.

If **ALL** spaces in your Café are occupied, you **CANNOT** take a Guest.

Slide all remaining Guests on the game board to the right and place a new Guest from the draw pile in the empty space at the left.

Take a Die and Carry Out the Action

Choose an Action space with at **LEAST** one die left and carry out the action. The **NUMBER** of dice on the Action space determines how much you get from the action.

Then, remove the die from the Action space and place it on the lowest visible number on your Turn Order tile.

The Actions

1 Die – For each die, you can take 1 **strudel** OR 1 **cake**. You cannot take **MORE cake** than **strudel**, but other than that limitation, you can take any combination.

2 Die – For each die, you can take 1 **wine** OR 1 **coffee**. You cannot take **MORE coffee** than **wine**, but other than that limitation, you can take any combination.

IMPORTANT – WHENEVER you receive dishes/drinks, you can place them IMMEDIATELY on a Guest's order. Place any excess in your Kitchen.

3 Die – For each die, you can prepare a room. Take a Room tile of your choice and place it on your Hotel board according to these rules:

- Each room **MUST** be adjacent to an already placed Room tile.
- The front (bellhop opening door) side **MUST** be visible.

- You **MUST** pay the cost according to the row of the Room space.
- The color of the room **MUST** match the color of the Room space.

If you place a room in the top right part of your Hotel board, you **IMMEDIATELY** receive the printed number of VP.

4 Die – For each die, you can advance 1 space on the Emperor track **OR** your Money track. You **CAN** split the total between the two tracks.

5 Die – You can play **EXACTLY ONE** Staff card from your hand. For each die, the cost is reduced by 1 krone. Pay the remaining cost by moving down on your Money track. The cost **CANNOT** be less than 0.

6 Die – Pay 1 krone and choose **ANY** of the other 5 actions (1-5). Take the action based on how many dice are on the 6 space and **NOT** the chosen action number.

Take Additional Actions

Only the first of these is limited to **ONCE** per turn. All others can be done **ANY** number of times. On your turn you can take the following additional actions:

- **ONCE** per turn, you can pay 1 krone to add 1 to the number of dice on the chosen Action space.
- You can pay 1 krone to move up to 3 dishes/drinks from your Kitchen to the orders on your Guest cards.
- You can place a wooden disk on a Politics card (if able).
- You can use a Staff card you played with a “once per round” (1x with the circular arrow) effect. If you do, turn it over, so you don’t accidentally use it again this round.
- You can move a Guest whose order is complete to a free room. You **IMMEDIATELY** receive the printed number of VP and the reward that the Guest provides. Guests can only move into an unoccupied room of the **SAME** color. Turn the room over and place the Guest on the discard pile.

If you turn over the last room in a group, you IMMEDIATELY receive the Occupancy bonus as marked at the top of your Hotel board. The Occupancy bonus is based on the size and color of the group.

After you finish your turn, the player with the lowest **VISIBLE** number on their Turn Order tile goes next.

PASSING

Instead of taking a turn, you can simply pass. You may want to do this if there are dice left on spaces you do not want to use.

When you pass, you **MUST** wait until every other player has either passed or taken **TWO** actions.

Once that happens, the player with the **LOWEST** number still showing on their Turn Order tile takes the remaining dice from **ALL** of the action spaces, removes ONE (to the dustbin) and rolls the rest again, sorting them and placing them as usual.

That player can then take a turn or pass again. Play continues in this fashion until all players have covered **BOTH** numbers on their Turn Order tiles **OR** there are **NO** dice left.

Politics Cards

Each Politics card shows a requirement. As **SOON** as you meet the requirement of a Politics card on your turn, you can place a wooden disk on the highest available space and you **IMMEDIATELY** receive the printed number of VP. You can only place **ONE** disk per Politics card.

END OF A ROUND

At the end of the 3rd, 5th, and 7th rounds, there is an Emperor Scoring. After the 7th round and its Emperor Scoring, there is a Final Scoring.

At the end of each round:

- Turn your Staff cards face-up.
- Pass your Turn Order tile to the next player in clockwise order.
- The new start player takes the dice and move the Round maker forward one space.

Emperor Scoring

Each player receives VP for their disk on the Emperor track, according to the value at the **BOTTOM** of their space.

Then each player moves their disk **BACK** a number of spaces – 3 / 5 / 7 spaces after the 1st / 2nd / 3rd Emperor Scoring.

If your disk ends up in the yellow area (at least space 3), you receive the Emperor Tile bonus. If your disk ends up in the black area (the 0 space), you suffer the Emperor Tile penalty. If your disk ends up in the gray area (space 1 or 2), you get neither the bonus nor suffer the penalty.

GAME END & FINAL SCORING

After the 7th round, following the Emperor Scoring, there is a Final Scoring:

- You receive VP for Staff cards that provide them.
- You receive VP for your **OCCUPIED** rooms: 1 / 2 / 3 / 4 VP for each in the 1st / 2nd / 3rd / 4th rows.
- You receive 1 VP for each krone and leftover dish/drink in your Kitchen.
- You **LOSE** 5 VP for each guest remaining in your Café.

The player with the most VP is the winner. If tied, the player with the most dishes, drinks, and krone left is the winner.
